

Let's start with the basics

Box Info

1 Product Dimensions

This is the basis for how we will price and build your box.

2 What's Your Budget

This helps guide us to the correct style of box. If you're not sure that's okay, as we get more information about your project we can get a better idea of a budget.

3 Box Style

4 Box Material

Soft-Touch

A soft-touch lamination added to the paper stock gives the box a luxurious velvety feel.

Corrugated

 **E flute** - Thinnest cardboard option, ideal for printing smaller boxes that require folding, such as takeout food containers and cosmetic packaging.

1.6mm

E Flute Is Best For Self Mailers

 **B flute** - Medium cardboard option, ideal for most printing due to its good printing surface. Used to hold small products, such as canned goods

5 What's Going in the Box

This information helps us determine how to keep the items inside the box safe and presentable, when building your box.

6 Custom Die Cut Inserts

Custom inserts will add a professional look to your final presentation, as well as safely house your items.

7 How is Your Box Being Presented

Will your box be handed out in person or individually shipped to the recipients. This helps us determine how your items should be packed. If your box is being shipped we can design a custom shipping box to house and protect your beautiful box, so it arrives safely and undamaged!
